Assignment # 2
JAVASCRIPT

1. Declare a variable called ***username***.

Code:

```
var username;
```

Output:

No output will be displayed because the variable is only declared.

2. Declare a variable called ***myName*** & assign to it a string that represents your Full Name.

Code:

```
var myName = "Azka-Tul-Shewal";  
alert(myName);
```

Output:

```
-----  
| Azka-Tul-Shewal |  
|           OK           |  
-----
```

3. Write script to
 - a) Declare a JS variable, titled ***message***.
 - b) Assign "***Hello World***" to variable ***message***
 - c) Display the message in alert box.

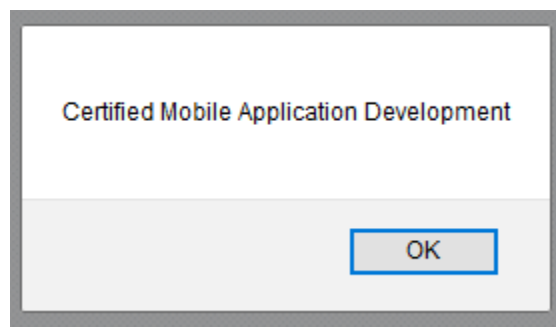

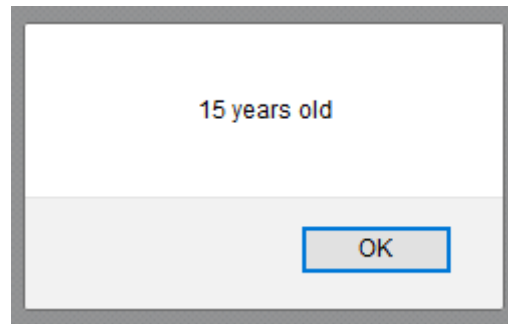

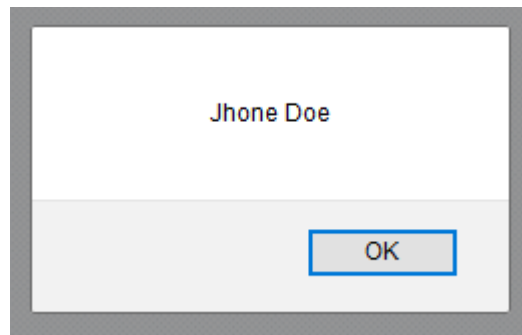

Code:

```
var message;  
message = "Hello World";  
  
alert(message);
```

Output:

```
-----  
| Hello World |  
|           OK           |  
-----
```

4. Write a script to save student's bio data in JS variables and show the data in alert boxes.

**Code:**

```
var studentName = "Azka-Tul-Shewal";  
var age = "20 Years Old";  
var course = "Web & Mobile App Development";  
var institute = "SMIT";  
  
alert(studentName);  
alert(age);  
alert(course);  
alert(institute);
```

Output:

Alert 1

Azka-Tul-Shewal

Alert 2

20 Years Old

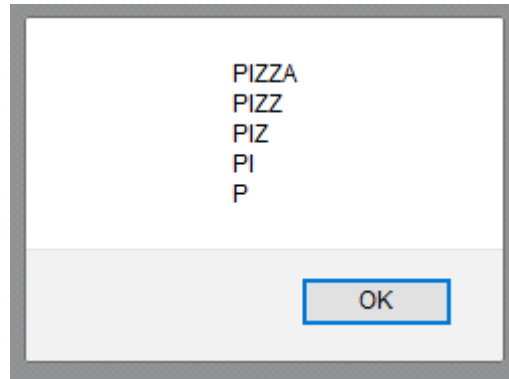

Alert 3

Web & Mobile App Development

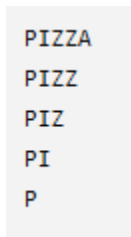

Alert 4

SMIT

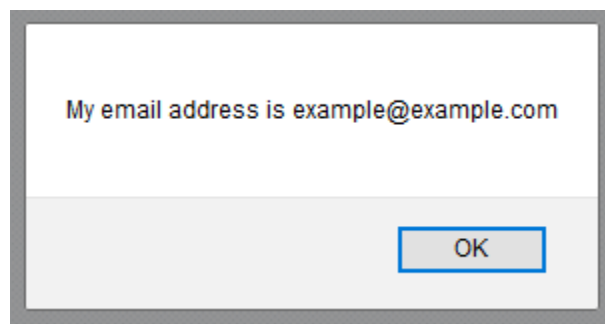

5. Write a script to display the following alert using one JS variable:

**Code:**

```
var pizza = "PIZZA\nPIZZ\nPIZ\nPI\nP";  
  
alert(pizza);
```

Output:

6. Declare a variable called ***email*** and assign to it a string that represents your Email Address(e.g. example@example.com). Show the blow mentioned message in an alert box.(Hint: use string concatenation)

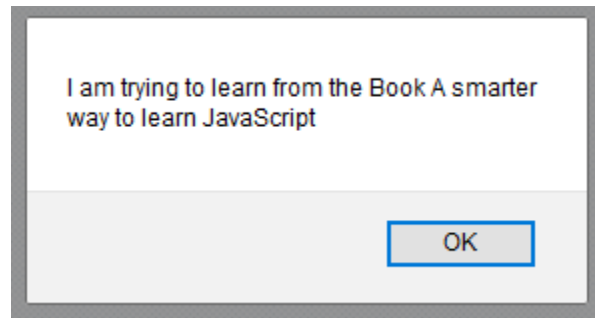

**Code:**

```
var email = "azka@example.com";  
  
alert("My email address is " + email);
```

Output:

```
My email address is azka@example.com
```

7. Declare a variable called book & give it the value “A smarter way to learn JavaScript”. Display the following message in an alert box:

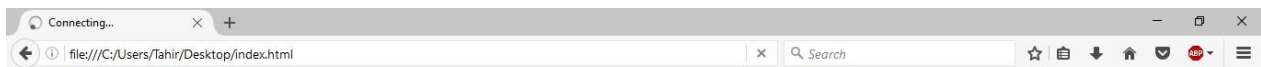

Code:

```
var book = "A smarter way to learn JavaScript";  
  
alert("I am trying to learn from the Book " + book);
```

Output:

```
I am trying to learn from the Book  
A smarter way to learn JavaScript
```

8. Write a script to display this in browser through JS

Yah! I can write HTML content through JavaScript

Code:

```
document.write("Yah! I can write HTML content through JavaScript");
```

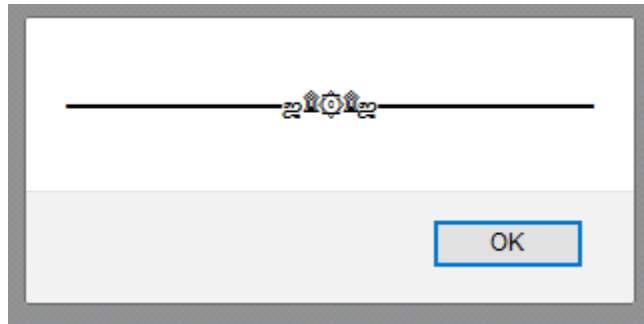

Output:

```
Yah! I can write HTML content through JavaScript
```

9. Store following string in a variable and show in alert and

browser through JS

“-----ஜிஊஜ-----”

Code:

```
var design = "-----ஜிஊஜ-----";  
  
alert(design);  
  
document.write(design);
```

Output:

-----ஜிஊஜ-----
