

Muhammad Huzaifa Khan

Assignment # 4
JAVASCRIPT

1. Declare 3 variables in one statement.

Code:

```
var firstName = "Azka", age = 20, city = "Karachi";  
  
document.write("Name: " + firstName + "<br>");  
document.write("Age: " + age + "<br>");  
document.write("City: " + city);
```

Output:

```
Name: Azka  
Age: 20  
City: Karachi
```

2. Declare 5 legal & 5 illegal variable names.

Code:

```
// Legal Variable Names  
var name;  
var _age;  
var $price;  
var myName;  
var user123;  
  
// Illegal Variable Names (Examples)  
// var 123name;  
// var my-name;  
// var var;  
// var user name;  
// var @email;  
  
document.write("<h2>Legal Variable Names</h2>");  
document.write("1. name<br>");  
document.write("2. _age<br>");  
document.write("3. $price<br>");  
document.write("4. myName<br>");  
document.write("5. user123<br><br>");  
  
document.write("<h2>Illegal Variable Names</h2>");  
document.write("1. 123name<br>");  
document.write("2. my-name<br>");  
document.write("3. var<br>");  
document.write("4. user name<br>");  
document.write("5. @email");
```

Output

Legal Variable Names

1. name
2. _age
3. \$price
4. myName
5. user123

Illegal Variable Names

1. 123name
2. my-name
3. var
4. user name
5. @email

3. Display this in your browser

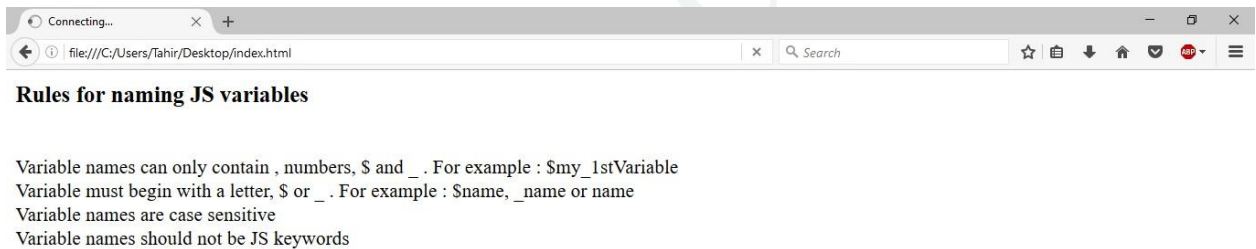

Code:

Output

- a) A heading stating “Rules for naming JS variables”
- b) Variable names can only contain _____, _____, _____ and _____.

For example **\$my_1stVariable**

- c) Variables must begin with a _____, _____ or _____. For example **\$name**, **_name** or **name**
- d) Variable names are case _____
- e) Variable names should not be JS _____

index.html - Visual Studio Code

-- END --

Code:

```
document.write("<h1>Rules for naming JS variables</h1>");

document.write("Variable names can only contain letters, numbers, $ and _.<br>");
document.write("For example: $my_1stVariable<br><br>");

document.write("Variables must begin with a letter, $ or _.<br>");
document.write("For example: $name, _name or name<br><br>");

document.write("Variable names are case sensitive.<br><br>");

document.write("Variable names should not be JS keywords.");
```

Output

Rules for naming JS variables

Variable names can only contain letters, numbers, \$ and _.
For example: \$my_1stVariable

Variables must begin with a letter, \$ or _.
For example: \$name, _name or name

Variable names are case sensitive.

Variable names should not be JS keywords.
